These injuries could be physical or mental, or could consist of damage to my property. Some risks are inherent in or integral to these activities and cannot be eliminated or reduced. Among these risks are the following:**

**CONCUSSION POLICY:**

Any JHSSC athlete suspected of having sustained a concussion/ traumatic brain injury will be removed immediately from participation in JHSSC sporting event (e.g. training, practice, camps, competitions or club activities), by the JHSSC member coach overseeing such sporting event. The athlete will be prohibited from further participation until evaluated and cleared in writing to resume participation in JHSSC sporting events or club activities by a qualified health care provider trained in the evaluation and management of concussive head injuries. The health care professional must certify to JHSSC in the clearance letter that he/she has successfully completed a continuing education course in the evaluation and management of concussive head injuries within three years of the day on which the written statement is made.

Upon removal of an athlete from participation for a suspected concussion/traumatic brain injury, the JHSSC member coach making the removal must also inform USSA Competition Services for athletes competing in USSA sanctioned events.

**Athletes who have subsequently been medically cleared to resume participation must provide such medical clearance** (as described above) to JHSSC (and USSA Competition Services for USSA competition athletes) in order to be permitted to participate in any JHSSC training programs and competitions that the JHSSC teams (Alpine, Freeride and Snowboard) participate in.

In addition we recommend that all JHSSC athletes participate in a computerized concussion assessment program called ImPACT Testing (Intermediate Post-Concussion Assessment and Cognitive testing). ImPACT Testing was developed by medical professionals to help evaluate post-concussion injury and track recovery for return to participation. Baseline ImPACT testing can be administered pre-season and is recommended by JHSSC.

**About Concussion**

A concussion is a type of traumatic brain injury (TBI) caused by a bump, blow, or jolt to the head. Concussions can also occur from a fall or a blow to the body that causes the head and brain to move quickly back and forth. Doctors may describe a concussion as a "mild" brain injury because concussions are usually not life-threatening. Even so, their effects can be serious.

**Risk of Continued Participation**

A repeat concussion that occurs before the brain recovers from the first—usually within a short period of time (hours, days, or weeks)—can slow recovery or increase the likelihood of having long-term problems. In rare cases, repeat concussions can result in edema (brain swelling), permanent brain damage, and even death.

JHSSC recommends that Members review the Center for Disease Control’s resources on concussion awareness at the following link:

[http://www.cdc.gov/concussion/HeadsUp/online\\_training.html](http://www.cdc.gov/concussion/HeadsUp/online_training.html)

By his/her signature below, MEMBER CERTIFIES THAT HE/SHE HAS READ AND UNDERSTOOD THIS AGREEMENT, and agrees in full with its terms, intend that it be binding on Member, his/her heirs, executors, administrators and assigns, and that it remain in full force and effect for as long as Member participates in JHSSC training, competition and related programs and activities.
